Education

2027 (exp.)	Ph.D., Economics, Clemson University Committee: Devon Gorry (Chair), Curtis J. Simon, Jonathan M. Leganza, Joseph Pedtke
2025	M.S., Economic Analytics, Clemson University
2021	M.S., Applied Economics, Illinois State University
2016	B.S., Economics, University of Nigeria, Nsukka

Fields of Interest

Labor Economics, Health Economics, Applied Econometrics

Working Papers

Job Market Paper

Health Insurance and Job Mobility: Evidence from the Affordable Care Act

Abstract: Health insurance can shape workers' job mobility by creating incentives to stay with or leave an employer. In this paper, I estimate the causal effect of Medicaid expansion on job switching among low-income childless adults using monthly Current Population Survey data and a difference-in-differences approach. I find that Medicaid expansion reduced job switching by 0.5 percentage points, representing an 18.3% decline in job mobility. The effect is concentrated among older workers, who place greater value on health insurance. These findings suggest that Medicaid expansion reduced the likelihood that low-income childless adults leave their jobs due to concerns about health insurance.

Heterogeneous Spillover Effects of Medicaid Expansion on SNAP Participation

Abstract: The provision of public health insurance can affect participation in other safety-net programs, such as SNAP. Using Current Population Survey ASEC data (2008–2019), I examine the heterogeneous effects of Medicaid expansion on SNAP participation across racial, gender, and education groups. I find that Medicaid expansion increased SNAP participation among Hispanic individuals by 20 percent relative to the pre-expansion mean, with no significant effects among White or Black individuals. I also find increased SNAP participation among individuals with a high school education or less, but no significant effect among those with more education. These findings suggest that Medicaid expansion differentially reduced informational and administrative barriers to safety-net participation across demographic groups.

Works in Progress

The Labor Market Effects of Paid Sick Leave Mandates in the United States

I study the effects of Paid Sick Leave mandates on employment, work status, hours worked, and annual earnings using a difference-in-differences approach. Preliminary results suggest limited effects among full-time workers but increases in hours worked and annual earnings among part-time workers.

Technical Skills

Methods: Causal Inference, Quasi-experimental Methods, Machine Learning, Experimental Design

Programming Languages: Python, Stata, SQL, Excel

Tools: LaTeX, Git

Teaching Experience

2023–	Principles of Microeconomics (Undergraduate, Fall, Spring & Summer) Instructor of Record, Clemson University, SC (6 semesters)
2023	Principles of Macroeconomics (Spring, Undergraduate) Teaching Assistant, Clemson University, SC
2022	Principles of Microeconomics (Fall, Undergraduate) Teaching Assistant, Clemson University, SC
2021, 2022	Intermediate Microeconomics (Fall & Spring, Undergraduate) Teaching Assistant, Clemson University, SC
2019, 2020	Intermediate Microeconomics (Fall & Spring, Undergraduate) Teaching Assistant, Illinois State University, IL

Professional Experience

2020	Research Assistant: Dr. Bibek Adhikari Illinois State University, Illinois • Cleaned, merged, and analyzed an IRS tax dataset of approximately 8 million rows in Stata across multiple waves of panel data, constructing linked analysis files for empirical research. • Reviewed academic literature and summarized empirical strategies for ongoing faculty research projects.
2016 – 2019	Data Analyst ShopRite Super-Shopping Centre, Enugu, Nigeria • Built forecasting models in Python and Excel to predict inventory demand across high-frequency transactional datasets, reducing stock shortages by 10%. • Queried and analyzed large transactional databases using SQL and Python to inform cost-allocation strategy and operational decision-making.

Presentations

2025	Carolina Region Empirical Economics
2022, 2024, 2025	Labor Economics Workshop, Clemson University, SC
2023	Industrial Organization Workshop, Clemson University, SC

Honors and Awards

2026	National Association for Business Economics (NABE) Foundation Scholarship
2021 – 2025	Graduate Teaching Assistantship, Clemson University
2019 – 2021	Graduate Research Assistantship, Illinois State University
